

Samir Kadam

Lead Technical Support Engineer

“Being part of Ansys, I am helping to develop transformational products by adopting simulation and thus changing the world”

BIO

Starting his career as preprocessing expert, Samir further expanded his expertise as Structural Analyst. He is eager to learn and enhance his technical skills to solve complex engineering problems. With his customer focused and positive attitude, he strives for new challenges.

GOALS

- Enable Ansys users to simulate and solve their evolving engineering needs
- Learn new skills and chase the excellence
- Never afraid of challenges

Ansys EXPERIENCE

Samir started his career at Ansys almost one and half decade ago as a part of Ansys Customer Excellence team. Over the years, he has served Ansys users through technical support, consulting services by helping them to solve their technical problems. He has led an excellent team of engineers while helping Ansys customers.
